Vehicle Information

Vehicle Name : CLIO IV

Year: 2013

VIN: VF15RRL0H49120313

Mileage : 74005.164mile

SN: A30M-WE56SDV

Diagnosis Route : RENAULT->Automatic Detection->CLIO IV

Fault Codes

10 systems detected: 4 systems related to fault codes, 13 fault codes

NO.	System Name	Status
1	General Power Control System (UPC)	▲ 7
	DF007 Upc-alternator link Invalid.	Current
	DF057 Battery disconnection unit Short circuit to earth.	Current
	DF057 Battery disconnection unit Open circuit	Current
	DF047 Front wiper protection Short circuit to earth.	Current
	DF079 12 V battery current sensor Communication disrupted	Current
	DF083 Stop and start module circuit Specific information	Current
	DF142 Battery voltage 12 v Open circuit or short circuit to earth	Current
2	Injection (INJ)	▲ 4
	DF1012 Consistent multiplex signals for cc/sl The data supplied to the cruise control or speed limiter are not correct.	Current
	DF644 Fuel flow regulator circuit Parameter at minimum stop	Current
	DF1356 Rail pressure regulation function Component blocked	Current
	DF1356 Rail pressure regulation function	Current
3	Anti-lock Braking System (ABS)	▲ 1
	DF193 Invalid inj. multiplex signals	Current
4	Central Control Unit (UCH)	▲ 1
	DF243 Starter Relay Open circuit or short circuit to earth	Storage
5	Airbag / Pretensioners (ABG)	✔
6	Instrument Panel (TDB)	✔
7	Air Conditioning (CLI)	✔
8	Variable P.A.S. (DAV)	✔
9	Radio (RDO)	✔
10	Hands-free Module (HFM)	✔
